

"Revolutionize

Your Maintenance Routine with
Our Aerosols!"

AEROSOL

INNOVATION IS INVISIBLE
BUT MEASURABLE :
ADVANCED LUBRICANTS
FOR MODERN MACHINERY

AERO LUB
SPECIALITIES

At **Aerolub**, we pride ourselves on being at the forefront of innovation in the aerosol and lubrication industry. We offer expert contract manufacturing services tailored to meet the unique needs of your business. Leveraging our state-of-the-art facilities and extensive industry experience, we deliver high-quality aerosol and lubrication products with precision and reliability.

Custom Formulation & Development : We specialize in developing custom formulations to match your specific requirements of customers. Our team of experts works closely with you to create products that meet your unique specifications.

Precision Filling & Packaging : Our advanced filling and packaging equipment ensures the accurate and efficient processing of your products. From small-scale to large-volume runs, our facilities are equipped to handle diverse packaging needs, including different can sizes, types of valves, and packaging styles.

Regulatory Compliance : We adhere to all relevant industry regulations and standards to ensure your products are compliant with local and international requirements. Our team stays updated with the latest regulatory changes to help you navigate compliance challenges and ensure your products are safe and market-ready.

Flexible Production Solutions : Our manufacturing capabilities are designed to offer flexibility in production volumes and timelines. Whether you require small-batch runs or large-scale production, we can accommodate your needs with efficiency and agility. Our scalable solutions allow you to adapt quickly to market demands and opportunities.

Seamless Integration : Our contract manufacturing services are designed to seamlessly integrate with your business operations. We offer transparent communication, timely project management, and dedicated support to ensure a smooth and efficient manufacturing experience.

Environmental Responsibility : CFC-Free Commitment

At Aerolub Specialities India Private Limited, we are dedicated to environmental sustainability and innovation. Our entire product line is designed to be CFC-free, reflecting our commitment to reducing environmental impact and promoting eco-friendly practices.

R&D & Infrastructure ; Our dedicated team works to ensure our products not only meet but exceed industry standards, delivering reliable and effective solutions to our customers. We utilize high-precision quality control and testing equipment, including pressure testers, leakage detectors, spray pattern analyzers, Salt Spray & Humidity Chambers.

Aerolub Speciality India Private Limited is equipped with state-of-the-art infrastructure to support the production capability of 450,000+ Cans per month. Our facility includes advanced aerosol filling machines, propellant gas fillers, valve and cap assembly machines, and environmental control systems. Our mixing and blending systems, along with specialized cleaning and maintenance equipment, further enhance our manufacturing capabilities.

CATEGORIES

MRO (Maintenance, Repair, and Operations) :

Products and tools used to maintain and repair equipment and facilities. This category includes lubricants, cleaning agents, and other maintenance supplies.

Corrosion Inhibitors : Chemicals or coatings applied to surfaces to prevent or slow down the deterioration caused by rust or corrosion.

Mould Maintenance : Products designed to clean, protect, and maintain moulds used in manufacturing processes, ensuring their longevity and optimal performance.

Electric Maintenance & Insulation : Materials and products used for the upkeep of electrical systems and for insulating electrical components to prevent short circuits and other issues.

Cleaners & Degreasers : Solutions used to remove dirt, grease, and contaminants from surfaces and equipment, improving performance and longevity.

Welding Spatter Release & DPT (Dye Penetrant Testing) : Products used to prevent welding spatter from sticking to surfaces and to detect surface cracks or defects through a dye penetrant process.

Anti-Friction Coatings : Coatings applied to reduce friction between surfaces, enhancing the efficiency and lifespan of moving parts.

Automotive Care Products : Products designed to clean, protect, and maintain vehicles, including waxes, polishes, and interior cleaners.

Partner with Aerolub Speciality India Private Limited for reliable, high-quality contract manufacturing solutions that drive your business success and meet your exacting standards.
